TABLE OF CONTENTS

to Volume 80, May–August, 1975

ARKING, ROBERT, Temperature-sensitive cell-lethal mutants of Drosophila: isolation and characterization 519–537

BAKER, BRUCE S., Paternal loss (*pal*): a meiotic mutant in *Drosophila melanogaster* causing loss of paternal chromosomes 267–296

BAKER, R. L., A. B. CHAPMAN and R. T. WARDELL, Direct response to selection for postweaning gain in the rat 171–189

BAKER, R. L. and A. B. CHAPMAN, Correlated responses to selection for postweaning gain in the rat 191–203

BAND, H. T., A survey of isozyme polymorphism in a *Drosophila melanogaster* natural population 761–771

BIRKY, C. WILLIAM, JR., Effects of glucose repression on the transmission and recombination of mitochondrial genes in yeast (*Saccharomyces cerevisiae*) 695–709

BOHREN, B. B., Designing artificial selection experiments for specific objectives 205–220

CARDELLINO, RICARDO A. and TERUMI MUKAI, Mutator factors and genetic variance components of viability in *Drosophila melanogaster* 567–583

CRONKITE, DONALD L., A suppressor gene involved in chemical induction of conjugation in *Paramecium aurelia* 13–21

CULBERTSON, MICHAEL R. and SUSAN A. HENRY, Inositol-requiring mutants of *Saccharomyces cerevisiae* 23–40

DAWSON, PETER S., Directional *versus* stabilizing selection for developmental time in natural and laboratory populations of flour beetles 773–783

DOERDER, F. P., J. H. LIEF and L. E. DOERDER, A corrected table for macronuclear assortment in *Tetrahymena pyriformis*, syngen 1 263–265

DUNCAN, IAN W. and THOMAS C. KAUFMAN, Cytogenetic analysis of chromosome 3 in *Drosophila melanogaster*: mapping of the proximal portion of the right arm 733–752

DUSENBERY, DAVID B., ROBERT E. SHERIDAN and RICHARD L. RUSSELL, Chemotaxis-defective mutants of the nematode *Caenorhabditis elegans* 297–309

ESLAVA, A. P., M. I. ALVAREZ, PATRICIA V. BURKE and M. DELBRÜCK, Genetic recombination in sexual crosses of Phycomyces 445–462

EWENS, W. J. and T. MARUYAMA, A note on the variance of the number of loci having a given gene frequency 221–222

HARTL, DANIEL L., Genetic dissection of segregation distortion. II. Mechanism of suppression of distortion by certain inversions 539–547

HIGHTON, RICHARD, Geographic variation in genetic dominance of the color morphs of the red-backed salamander, *Plethodon cinereus* 363–374

HOPPER, ANITA K. and BENJAMIN D. HALL, Mating type and sporulation in yeast. I. Mutations which alter mating-type control over sporulation 41–59

HOPPER, ANITA K., J. KIRSCH and BENJAMIN D. HALL, Mating type and sporulation in yeast. II. Meiosis, recombination and radiation sensitivity in an *aa* diploid with altered sporulation control 61–76

HOPPER, ANITA K. and BENJAMIN D. HALL, Mutation of a heterothallic strain to homothallism 77–85

KANO, YASUNOBU and FUMIO IMAMOTO, Polarity in segments of the *Escherichia coli trp* operon with deleted intraoperonic translational initiation signals 651–666

LEDBETTER, MARY LEE S. and ROLLIN D. HOTCHKISS, Chromosomal basis of the merozygosity in a partially diploid mutant of Pneumococcus 667–678

LEDBETTER, MARY LEE S. and ROLLIN D. HOTCHKISS, Recombination as a requirement for segregation of a partially diploid mutant of Pneumococcus 679–694

LOUKAS, M. and C. B. KRIMBAS, The genetics of *Drosophila subobscura* populations. V. A study of linkage disequilibrium in natural populations between genes and inversions of the *E* chromosome 331–347

MATAGNE, R. F. and R. LOPPES, Isolation and study of mutants lacking a derepressible phosphatase in *Chlamydomonas reinhardi* 239–250

MCKENZIE, J. A., Gene flow and selection in a natural population of *Drosophila melanogaster* 349–361

MEADE, JAMES H. and HERBERT GUTZ, A new type of mutation in *Schizosaccharomyces pombe*: Vegetative iodine reaction 711–714

MYHR, B. C. and J. A. DIPAOLO, Requirement for cell dispersion prior to selection of induced azaguanine-resistant colonies of Chinese hamster cells 157–169

MITRA, S., On Nei and Roychoudhury's sampling variances of heterozygosity and genetic distance 223–226

MYLYK, OREST M., Heterokaryon incompatibility genes in *Neurospora crassa* detected using duplication-producing chromosome rearrangements 107–124

NAGYLAKI, THOMAS, Conditions for the existence of clines 595–615

NEWTON, AUSTIN and EILEEN ALLEBACH, Gene transfer in *Caulobacter crescentus:* Polarized inheritance of genetic markers 1–11

NYBERG, DENNIS, Genetic analysis of copper resistance in *Paramecium aurelia* syngen 4 463–473

NYBERG, DENNIS, Limits to the advantage of recombination in increasing the rate of incorporation of favorable mutants 617–619

ONG, TONG-MAN and F. J. DE SERRES, Mutation induction by difunctional alkylating agents in *Neurospora crassa* 475–482

ORIAS, EDUARDO and CANDACE J. NEWBY, Macronuclear genetics of Tetrahymena. II. Macronuclear location of somatic mutations to cycloheximide resistance 251–262

OU, JONATHAN T., Recombinant clone heterogeneity in *Escherichia coli* conjugation: effect of PH and partially replicated recipient deoxyribonucleic acid 401–419

PERKINS, DAVID D., The use of duplication-generating rearrangements for studying heterokaryon incompatibility genes in Neurospora 87–105

PEVZNER, IGAL, ARNE W. NORDSKOG and MERLIN L. KAEBERLE, Immune response and the *B* blood group locus in chickens 753–759

RAMIREZ, SAMUEL A. and JOHN H. SINCLAIR, Intraspecific variation of ribosomal gene redundancy in *Zea mays* 495–504

RAMIREZ, SAMUEL A. and JOHN H. SINCLAIR, Ribosomal gene localization and distribution (arrangement) within the nucleolar organizer region of *Zea mays* 505–518

RANK, G. H., A. J. ROBERTSON and K. L. PHILLIPS, Modification and inheritance of pleiotropic cross resistance and collateral sensitivity in *Saccharomyces cerevisiae* 483–493

RAPACZ, JAN, NANCY KORDA and W. H. STONE, Serum antigens of cattle. IV. Immunogenetics of a soluble antigenic determinant derived from lysed erythrocytes 323–329

RAVIN, ARNOLD W. and MICHAEL MA, A transforming marker that produces merodiploids with high efficiency and stable transformants with low efficiency in Streptococcus 421–443

ROBERTS, PAUL A., In support of the telomere concept 135–142

ROTHMAN, FRANK G. and ELLEN T. ALEXANDER, Parasexual genetic analysis of the cellular slime mold *Dictyostelium discoideum* A3 715–731

ROUFA, DONALD J. and SUSAN J. REED, Temperature-sensitive mutants of a Chinese hamster cell line. I. Selection of clones with defective macromolecular biosynthesis 549–566

SINGH, R. S., J. L. HUBBY and L. H. THROCKMORTON, The study of genic variation by electrophoretic and heat denaturation techniques at the octanol dehydrogenase locus in members of the *Drosophila virilis* group 637–650

SMITH, DAVID A., A mutant affecting meiosis in Neurospora 125–133

SPIETH, P. T., Population genetics of allozyme variation in *Neurospora intermedia* ... 785–805

STRAUS, DANIEL S. and GEORGE R. HOFFMANN, Selection for a large genetic duplication in *Salmonella typhimurium* 227–237

TAYLOR, CHARLES E., Genetic loads in heterogeneous environments 621–635

TSUNO, KENDO, Esterase gene frequency differences and linkage equilibrium in *Drosophila virilis* populations from different ecological habitats 585–594

ULLRICH, ROBERT C. and JOHN R. RAPER, Primary homothallism—Relation to heterothallism in the regulation of sexual morphogenesis in Sistotrema 311–321

WATANABE, TAKAO K. and SEIDO OHNISHI, Genes affecting productivity in natural populations of *Drosophila melanogaster* 807–819

WEHRHAHN, C. F., The evolution of selectively similar electrophoretically detectable alleles in finite natural populations 375–394

WELSHONS, W. J. and D. O. KEPPY, Intragenic deletions and salivary band relationships in Drosophila 143–155
